

# Short Hair. Do Care.

## Cover Page

Client: The Vagina Monologues @ UCSD

### Upcoming features and items:

As of right now we are towards the end of the project, we have completed most of the coding structuring both the mobile site and desk top version. The only things we have yet to complete mostly rely on image placement. Since The Vagina Monologues is so image heavy, we have to compress all the images so the website isn't over loaded. Other than that, the main features we still need to implement are 1. footers with social media link and 2. Donation content. Both of which would be linked based on the social media and donation link the client will provide us.

Since The Vagina Monologues is an UCSD org. They will be hosting their website with ucsd.edu So the functionality of the website is guaranteed.

### Statement of issues and fallback plans:

In the case that the client can't provide us donation link, we will change the content of the donation bar so audience can contact the client directly for donation infos. As mentioned before, since TVM is so image heavy, if time does not permit we will only be uploading a portion of the pictures in "Cast N Crew", and "Gallery"; but we will make sure the functionality of both pages works.
